

FLAME RESISTANT REFLECTIVE TAPE		Backing	 EN 20471	 EN 469	Domestic or Industrial wash
XM-8011 PRO		Malta HT			

Description

Reflective tape XM-8011 Pro in Silver colour with FR properties. Designed for Heat Transfer application on FR-workwear and Firefighters clothing. XM-8011 Pro is a high-tech material and its adhesive properties varies depending on type of fr fabric. We advise you before the first use to check the grip of the tape by applying it on a certain FR-clothing. It is also useful to make trial washes of fr-clothing with applied reflective tape.

Product Construction

This Reflective Material is a PU+Polyester resin with numerous glass micro-lenses impregnated into adhesive layer and placed on a film liner. The light reflects from these micro-lenses and comes back to a car (or other sources of light) making the person wearing reflective

Product Detailed Information

Material	FR PU+Polyester
Finish	Flame retardant
Colour	Silver
Industrial wash	-
Roll, Width	50 mm
Roll, Length	100 meters
Roll, Weight	2.35 kgs

Product Certifications

NFPA 2112	-
ANSI 107	-
CSA Z96 (Level 2)	-
EN 20471	100×75°C ISO 15797
EN 469	100×75°C ISO 15797
EN 15384	100×75°C ISO 15797
OEKO-TEX 100	Class 2
Certificate of Test	Aitex (Spain)

Care Instructions

	Wash	Machine Wash Warm, 75°C
	Bleach	Do not bleach
	Dry	Tumble Dry Low, 55°C
	Dry-clean	Do not dry clean
	Iron	Iron at low temperature, 110°C

Important Notice

Type of work environment, exposure conditions and maintenance have an impact on reflective performance. Please test each tape according to appropriate care instructions required for the garment.

High-visibility clothing made with reflective material should be maintained in good condition and inspected regularly for damage or deterioration.

Method of Application

Please contact us for instructions or check our web-site.

Shelf Life

Keep in cool dry place, with no direct sunlight. Use the product during 12 months from the date of purchase.
